Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to the anti-lock braking system, classified in class 303, subclass 162+.
 - II. Claims 8-22, drawn to the vehicle and stability control system, classified in class 180, subclasses 178+ or 247+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the vehicle, as claimed, does not require the particulars of the anti-lock braking system as set forth in claims 1-7. The subcombination has separate utility such as an anti-lock braking system with separate classification—class 303.
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 703-308-0576. The examiner can normally be reached on M-F 9:30-6:00.
